

Animal, vegetable or mineral?

Were you paying attention in science class? Do you know your vegetables from your minerals? We'll soon find out. Cut out the words below and put them in a carrier bag, envelope or freezer bag before you set off in the car.

How it works

1. Take it in turns to pick an animal, vegetable or mineral suggestion out of the bag
2. You have to tell everyone which of the three categories it comes under, for example if it's a marble, it's made of glass so it's a mineral
3. Everyone has to ask you questions to help them guess what it is, but you can only answer 'yes' or 'no'. The questions can be things like:
Is it green?
Does it grow on trees?
Is it useful?
Do people make jewellery out of it?
4. After each question, that person has one go to guess the right animal, vegetable or mineral
5. The winner is the person who gets it right

A gold necklace

Bumble bee

Human

Carrot

Elephant

A marble

A tin can

Shark

Snake

Mushroom
